Objective

BSCS student with hands-on experience in AI/ML and full-stack development (MERN), seeking an internship to apply technical skills in building scalable applications and intelligent systems.

Education

Bachelor of Science in Computer Science

Information Technology University, Lahore

Expected Graduation: 2027

Technical Skills

- **Languages:** Python, JavaScript, C++
- **Web:** MERN Stack (MongoDB, Express.js, React, Node.js)
- **Databases:** MySQL, MongoDB, Vector Databases
- **AI/ML:** NLP, Computer Vision, Model Integration
- **Tools:** Git, GitHub, REST APIs

Projects

AI Resume Screening System

- Developed a system to analyze resumes and match them with job descriptions
- Implemented keyword extraction and ranking for candidate filtering

University Management System

- Developed a full-stack web application to manage student, faculty, and course records
- Implemented CRUD operations, authentication, and database integration using MERN stack

AI Chatbot for Real Estate

- Designed a chatbot to handle real estate queries and automate responses
- Integrated backend APIs for dynamic property data

Vector Database Implementation

- Implemented vector-based search using embeddings for similarity matching

Trading Alert System

- Built a system to monitor market data and generate real-time alerts using APIs

Experience

AI/ML Intern — ModSolutions (6 Months)

- Worked on machine learning models and data processing pipelines
- Contributed to AI-based solutions for real-world applications
- Assisted in model optimization and deployment

Additional

- Strong problem-solving and analytical skills
- Fast learner with adaptability to new technologies
- Interest in AI systems and scalable web applications
